

POSTER PRIZES SCHEDULE

(8 minutes each)

September 23

16.00 – 17.00 **Poster Prizes Chairpersons: Francesco Bonomi (Milan), Paola Chiarugi (Florence)**

Arese Marco (University of Torino)

The neuronal protein Neuroligin 1 promotes colorectal cancer progression by modulating the APC/beta-catenin pathway.

Bevacqua Emilia (University of Calabria)

Dextran-curcumin nanoparticles as drug delivery vehicle: inhibition of prostate cancer progression.

Bigi Alessandra (University of Firenze)

DIAGNOSTIC AND THERAPEUTIC POTENTIAL OF SINGLE DOMAIN ANTIBODIES IN ALZHEIMER'S DISEASE ,

Frusciante Luisa (University of Siena)

STRUCTURAL BASIS FOR THE RECOGNITION OF SARS-COV-2 BY HUMAN NICOTINIC ACETHYLCHOLINE RECEPTORS

Pratelli Giovanni (University of Palermo)

Anti-adipogenic potential of bio-waste products of Sicilian mango in 3T3-L1 cells

September 24

15.30 – 16.30 **Poster Prizes Chairpersons Paola Bruni (Florence) Luigi Palmieri (Bari)**

Abruzzese Vittorio (Università di Basilicata)

The role of ABCC6 and NT5E inhibitors in colon cancer cells.

Emide Davide (University of Milano)

Molecular information for addressing climate changes (and consumers' demands): wheat proteins, DeFENS

Gatticchi Leonardo (University of Perugia)

CRISPR/Cas9-mediated knock-out of AGXT1 in HepG2 cells as a new in vitro model of Primary Hyperoxaluria Type 1

Murtas Giulia (University of Insubria)

Deepen human D-3-phosphoglycerate dehydrogenase biochemical properties to get insight in L-serine metabolism".

Visibelli Anna (University of Siena)

Machine learning approaches in precision medicine: applications to an integrated bioinformatics digital ecosystem platform for a rare disease
